

SDMX Reference Architecture for national institutes

As announced during a workshop in Madrid, in September 2009, the release 1.0 of the SDMX reference architecture for national institutes is now available. This includes all the re-usable building blocks for implementing the SDMX IT architecture and the "Mapping Assistant".

Access through CIRCA at the following link: [click here](#)

The software is provided as open source, so that it can either be used as a whole, or each building block can be modified and integrated in a specific environment

The software is organized into three folders:

-  [Classes for building an SDMX Infrastructure for providing data \(.NET version\)](#)

-  [Classes for building an SDMX Infrastructure for providing data \(JAVA version\)](#)

-  [SDMX Mapping Assistant tool](#)

Each package is organized in a ZIP file with several folders inside as follows:

In "app" you can find the binary version

In "doc" you can find the documentation

In "lib" you can find libraries

In "src" you can find the source code
